PRESS RELEASE FROM THE PREMIER, MR. DUNSTAN.

UTAH DEVELOPMENT CO.

9.11.72

The Premier and Mines Minister, Mr. Dunstan, announced today that Utah Development Company have been granted Exploration Licence No. 14 in the McDouall Peak-Kingoonya area for twelve months commencing on October 5, 1972.

The Licence covers an area of 11,208 square kilometres adjoining the Coober Pedy Opalfield and lies within the Woomera Prohibited area.

Utah Development Company, the partly Australian owned, Australian based subsidiary of Utah International, is engaged in the production of coal from the Bowen Basin in Queensland, Mr. Dunstan said. Utah's interest in exploration for coal in South Australia was based on the known occurrence at Lake Phillipson where Government boring operations in 1904 disclosed the presence of several coal seams up to 28 feet in thickness.

Geological and geophysical surveys with follow-up stratigraphic drilling in the Arckaringa Basin undertaken by the Department of Mines over the past ten years has shown the existence of coal seams over a large area which Utah now propose to investigate further.
